PHOTOGRAPHIC INTELLIGENCE MEMORANDUM

MIELEC, POLAND AIRCRAFT FACTORY

This report, which estimates the total floor space of the Mielec, Poland Aircraft Factory, has been compiled from a comparative study of captured German World War II vertical photography and ground photographs taken by military attaches between April 1952 and April 1955.

25X1D Although the [REDACTED] vertical photos give complete coverage of the factory, the 1952-1955 ground photos do not. Some buildings were obscured by larger buildings in the foreground and some buildings were probably not photographed at all.

A list of all visible buildings, giving dimensions and floor area is enclosed (Fig. 1).

A sketch of the plant (Fig. 2) is also enclosed on which each building is numbered and colored. The building numbers on the sketch correspond to the building numbers on the list.

The buildings have been divided by color into four categories:

1. Blue - buildings observed in both [REDACTED] 1952-55 photography.
2. Brown - buildings present in [REDACTED] but either were not covered by later photography or were obscured so their existence could not be verified.
- 25X1D 3. Red - new buildings since [REDACTED]
- 25X1D 4. Yellow - buildings present in [REDACTED] but have been removed since then.

~~SECRET~~

It is estimated that the calculated 1,027,150 sq. ft. floor area of the factory is accurate to within plus or minus 15 per cent. Greater accuracy could not be obtained primarily for two reasons:

1. Approximately 15% of the buildings observed in [REDACTED] photography could not be verified on the recent incomplete photo coverage.
2. Lack of photogrammetric data on the recent ground photographs precluded very accurate dimensioning of the new buildings.
